Education

Vidyavardhini's College of Engineering and Technology Vasai, India
Bachelor of Engineering in Computer Science & Engineering (Data Science) *July 2023 – May 2027*

- Expected Graduation: May 2027 — Current Year: Final Year

Technical Skills

Languages: C, Java, Python, JavaScript
Frontend: HTML, CSS, React.js
Backend: Node.js, Express.js, REST APIs
Databases: MongoDB, MySQL
Cloud & Tools: AWS, Git, GitHub, Linux, Postman
Core CS: Data Structures & Algorithms, OOP, Computer Networks, Operating Systems, Database Management

Experience

Cloud Architect October 2025 – May 2026
Google Developers Group onCampus - VCET *Vasai, India*

- Leading cloud architecture initiatives and promoting cloud computing best practices within the campus developer community
- Organizing workshops, hackathons, and knowledge-sharing sessions on cloud technologies, DevOps, and deployment strategies

Projects

MediBot: Disease Prediction Using Symptoms | *AI/ML*

- Built an ML web app that predicts diseases based on symptoms using Random Forest, Naive Bayes, and Logistic Regression
- Trained models on a large Kaggle dataset and stored them using Pickle/Joblib for real-time inference
- Developed REST APIs with Flask and integrated them with a chatbot-style frontend using JavaScript
- Implemented fuzzy matching and accuracy comparison of all models to present top-k predictions with confidence scores

E-commerce Platform with AI Integration | *MERN Stack* Ongoing

- Built a full-stack MERN e-commerce platform featuring user authentication, product browsing, cart management, order placement, and admin controls
- Integrated AI-powered recommendation system to personalize product suggestions based on user behavior and purchase history
- Implemented secure APIs using Node.js + Express, handled database operations with MongoDB, and built responsive UI components with React
- Added payment workflow, product filters, and real-time updates using context/state management and optimized backend routing

FilmVault - Movie Discovery Web App | *React, Vite, Tailwind CSS, TMDB API, Axios, Netlify*

- Developed a movie discovery and watchlist application with real-time TMDB API integration
- Implemented genre filtering, pagination, and persistent watchlist using localStorage
- Built reusable React components with responsive UI using Tailwind CSS
- Deployed the project on Netlify and optimized performance using Vite

Achievements

Wheel of Fortune Syntech-X (2023-24 Winner)
Selected as Cloud Architect at GDG onCampus VCET for 2025–26 academic year
Completed multiple programming certifications across C, C++, JavaScript, and AI tools

Certifications

Full Stack Web Dev. (GeeksForGeeks) **React.js** (Scaler) **Node.js** (Scaler)
MongoDB Overview (MongoDB) **JAVA** (Scaler) **Python** (Codedex)
AI Tools (GeeksForGeeks) **C Programming** (GeeksForGeeks) **C Programming** (SoloLearn)
